

XM Satellite radio is the best source of information for the traveler. XM provides 24 hour news channels, 24 weather channels, 24 hour traffic channel and other vital information needed to keep aware and safe on the roadway. I personally support satellite radio as well as the regionalized information channels they provide. Local stations are mandated to air commercials even during periods of emergency situations delaying vital information, whereas XM gets their funding from me the customer. I don't have to search for a station in an unfamiliar area to get the vital information that I need. I simply turn the dial on my radio to the correct regional traffic, weather or news feed channel and get the information I need now from anywhere in the US I need it. Please don't let this petition ruin this nation wide information system for travelers and people who have found the extreme benefit of nation wide high quality news, weather, traffic and entertainment system from one source.
